Subject Index

A340 airbus aircraft 261-270
Aero-engine rotor vibration 39-51
Aeroelastic modes 27-37
Aerospace planes 9-17
Aerospace planes, transatmospheric 231-245
Air transport aircraft 129-134
Airborne towed targets, multi-role 93-100
Aircraft maintenance 129-134
Aircraft plates, buckled 281-290
Aircraft wing mass prediction 135-145
Airframe integrity 19-25
Alloy, aluminium lithium AA8090 117-121
Alloys, rhenium 147-155
Alloys, super - *see* Superalloys
Alloys, yttrium 147-155
Aluminium lithium alloy AA8090 117-121
Approximate equations 297-307
ARINC 429 data bus 181-187
Ascending trajectories, aerospace planes 231-245
Autothrottle servo motors 181-187
Axisymmetric jets, twin non-parallel 309-321

Bathfp software package 261-270
Bi-stable damper valves 261-270
Boeing 777 aircraft 181-187
Boundary layer transition 167-179
Bubble dynamics in rotating fluids 221-230
Buckled aircraft plates 281-290
Buffeting, fin 247-260

Cable body airborne simulator 93-100
Carbon fibre reinforced plastic 1-7
CBAS - *see* Cable body airborne simulator
Chaotic vibration 281-290
Compensation, non-linear 123-127
Composite fracture behaviour 1-7
Composites fatigue 101-107
Computer simulation 261-270,.291-296
Contact pressure, tyre 109-116
Coolants 9-17
Coupling, trilobe 189-202
Crack path behaviour, fatigue 117-121
Cryogenic helium 221-230
Curvature, waverider multi-directional 297-307
Curved diffusers 65-75
Cylinder wake 167-179

Damper valves, bi-stable 261-270
Dampers, squeeze-film 39-51
Data bus, ARINC 429 181-187
Data buses 157-165
Design safety analysis 271-279,345-355
Dewars, spin-up rotating 221-230
Diffusers, curved 65-75
Drives, splineless, stress analysis 189-202
Dual spin-satellites, shielded 53-63

Electrostatic suspension system 123-127
Electrostatically suspended gyroscopes 123-127
Entrainment 309-321

Failure modes effects and criticality analysis 345-355
Fatigue, composite 101-107
Fatigue, variable amplitude 101-107
Fatigue crack path behaviour 117-121
Fatigue life bests 19-25
Fighter aircraft, thrust vectoring 333-343
Fin buffeting 247-260
Finite element analysis 109-116,203-207
Finite element modelling 77-92
FLAIR surface regression model 209-220
Flight flutter testing 27-37
Flight tests 93-100
Flow characteristics 65-75
Fluids, rotating, bubble dynamics 221-230
Fluorine coolant 9-17
FMECA - *see* Failure modes effects and criticality analysis
Foundry technology 147-155
Fracture behaviour at low temperatures 1-7
Frequency response functions 77-92

Gas turbine engines 291-296
Global directional stability 53-63
Grain design, solid propellant 209-220
Gyroscopes, electrostatically suspended 123-127

Health and usage monitoring system 271-279
Helicopter rotor and transmission systems 345-355
Helium, cryogenic 221-230
Hercules aircraft 129-134
HUM system - *see* Health and usage monitoring system
Hydrogen coolant 9-17
Hypersonic aircraft 9-17
Hypersonic small disturbance theory 297-307

Integrity, airframe 19-25
Integrity, structural 19-25
Interlaminar shear strength 1-7

Jets, twin non-parallel axisymmetric 309-321

Landing gear 261-270
Liapunov direct method 53-63
Life expectancy 101-107
Liquid fluorine coolant 9-17
Liquid hydrogen coolant 9-17
Liquid methane coolant 9-17
Liquid oxygen coolant 9-17
Lithium aluminium - *see* Aluminium lithium
Low earth orbit 323-332
Low temperature fracture behaviour 1-7
Lyapunov function 291-296

Maintenance, aircraft 129-134
Mass prediction, aircraft wing 135-145

Single crystal superalloys 147-155
Single fin aircraft 247-260
Solid propellant grain design, rocket 209-220
Spin-up rotating dewars 221-230
Splineless drives stress analysis 189-202
Splines, modified surface 77-92
Splitter vanes 65-75
Squeeze-film dampers 39-51
Stability, global directional 53-63
Stability, satellite 53-63
Stress analysis in splineless drives 189-202
Structural analysis, SAFE 203-207
Structural integrity 19-25
Superalloys, single crystal 147-155
Surface regression technique 209-220
Surface splines, modified 77-92
Suspension system, electrostatic 123-127

Targets, airborne towed multi-role 93-100
Teaching Company Scheme Satellite 323-332
Thrust vectoring fighter aircraft 333-343
Towed targets, airborne multi-role 93-100
Trajectories, aerospace planes 231-245
Transatmospheric aerospace planes 231-245
Transmission, rotorcraft 271-279
Transmission and rotor systems, helicopter 345-355
Transport aircraft, air 129-134
Transport aircraft, military 129-134
Trilobe coupling 189-202
Tristar aircraft 129-134
TuCSAT - *see* Teaching Company Scheme Satellite
Turbine engines, gas - *see* Gas turbine engines
Turbofan engines 291-296
Twin non-parallel axisymmetric jets 309-321
Tyre contact pressure 109-116
Tyres, radial 109-116

Valves, bi-stable damper 261-270
Vanes, splitter 65-75
Variable amplitude fatigue 101-107
VC10 aircraft 129-134
Vibration, aero-engine rotor 39-51
Vibration, chaotic 281-290
Vibration, non-linear 281-290
Von Karman vortex street wake 167-179
Vortex street wake, von Karman 167-179

Wake, cylinder 167-179
Wake, von Karman vortex street 167-179
Waverider, multi-directional curvature 297-307
Wheel rims 109-116
Wing mass prediction, aircraft 135-145

Yttrium alloys 147-155
